Beginner Blog Launch Checklist
Start your blog the right way — no tech headaches, no fluff.
Brought to you by **CreatorStack**

✅ Step 1: Choose Your Blog Topic (aka Niche)

Pick a topic you can write about consistently and that people care about. Ask:

- What do I enjoy?

- What do people ask me for advice on?

- Are people searching for this online?

💡 Examples: personal finance, fitness, side hustles, travel, tech, food.

✅ Step 2: Pick a Domain Name

Your domain should be short, memorable, and relevant to your niche.
Tip: Avoid dashes, numbers, or anything hard to spell.

👉 Use a registrar like Google Domains or Porkbun (no affiliate link needed here).

✅ Step 3: Get Hosting + Install WordPress

You need hosting to put your blog online. A beginner-friendly option:

- 👉 **Systeme.io** – Free hosting, website builder, email, and funnels
  Try Systeme.io

💡 Systeme.io gives you everything in one platform — ideal if you're starting with a lean budget.

✅ Step 4: Choose a Blog Theme

Pick a clean, mobile-friendly theme for your site:

- **Astra** – lightweight and beginner-friendly
  [Try Astra](#)
- **Kadence** – fast and highly customizable
  [Try Kadence](#)

💡 Tip: Don't overthink this. Pick a theme, customize the basics, and move on.

✅ Step 5: Write Your First Blog Post

Start simple:

- Introduce yourself

- Share why you started your blog

- Help solve one beginner problem

✅ Step 6: Set Up These Tools

To grow your blog, install these essentials:

- ✅ **MailerLite** – build your email list + automations
  [Try MailerLite](#)
- ✅ **SolidWP SEO** – help Google find your site
  [Check out SolidWP](#)
- ✅ **Pretty Links** (Free or Pro) – clean up and manage affiliate links

- ✅ **Google Analytics** – track traffic and performance

✅ Step 7: Join Affiliate Programs

Start earning by promoting tools you use and trust. You're already approved for:

- **MailerLite** (email)

- **ConvertKit** (email & creator tools)

- **Systeme.io** (funnels, hosting)

- **Astra**, **Kadence**, **SolidWP** (themes + WordPress tools)

- **GiveWP**, **Orderable**, **Restrict Content Pro**, **LearnDash**, **The Events Calendar**, **IconicWP**

💡 Tip: Focus on solving problems with your content, and recommend tools naturally.

🎉 You're Ready to Launch

It doesn't have to be perfect — just go live and improve as you go.
